

GOBLIN

247U-007 S3S FO SR ESD

STANDARD EN ISO 20345:2022

SIZES 37-48

Three-dimensional **SPYDER-NET Green** recycled lining with moisture absorption and release properties. Its special three-dimensional structure provides exceptional shape memory and high snag-resistance

Bi-component **TYRE PU-TPU** sole designed to offer maximum flexibility and durability. The thermoplastic outsole ensures remarkable mechanical features without affecting lightness and abrasion resistance

TYRE bicomponente PU/TPU

- High-density design to ensure maximum ground support
- Long flow channels for excellent sole cleaning
- Uniform heel lugs to ensure an efficient cushioning effect

100% recycled polyester laces

PU-Tek Green: breathable recycled fabric, water-and abrasion-resistant

ALU200 aluminium toe cap and **TXZERO STRONG** anti puncture insole made of high tenacity fibers to obtain a flexible textile that adapts to the movement of the foot; it is intrinsically antistatic

B-01

- Anatomical insole made of polyurethane compound for improved comfort
- TPE charge system for an even distribution of energy
- Lining with through-holes to increase air circulation

A - Antistatic

PS - Non-metal anti-perforation insert (truncated cone nail)

E - Energy absorption in the heel region

FO - Sole resistant to hydrocarbons

Toecap resistant up to an impact of 200 joules and crushing of 15 KN

WPA -Upper resistant to water penetration and absorption

SR -Slip resistance on ceramic tile with glycerin

Ultralight and flexible sole thanks to Smart Injection: this special technology combines the mold construction with the injection process of the PU Esolight 2.0 compound and allows to achieve different PU-densities guaranteeing lightness, flexibility and durability
