

KENYA

169U-015 S3 SRC

Standard EN ISO 20345:2011

Sizes: 36-47

Antistaticity

Impact and compression resistance

Hydrocarbon resistant outsole

Puncture resistance

Energy absorption at the heel

Upper resistance to water penetration and absorption

Three-dimensional **Spyder-Net** lining with moisture absorption and release properties. Its special three-dimensional and non-deformable textile structure ensures lasting comfort, breathability and elasticity.

The **Tyre dual density Pu** sole is light and sporty. Thanks to the Smart Injection Technology, it guarantees excellent flexibility and durability together with slip and abrasion resistance.

Easy-fit system for perfect comfort.

X-Weave nylon is a onepiece upper with different textures for different functional areas. Extremely flexible, breathable, tearing and abrasion resistant.

Toe cap reinforced with **TPU film** to provide greater durability.

Ultra-light and flexible sole with **Smart Injection**: a special technology that, through the combination of a peculiar mold build-up and the injection of PU Esolight 2.0 compound, provides for different densities and at the same time guarantees lightness, flexibility and durability.

PZ88 fiberglass toe cap and anti-puncture **Txzero** textile insert for extreme lightness, protection and flexibility.

Sole TYRE PU DUAL DENSITY

- SRC Slip-resistant outsole
- Fuel oil resistance sole
- Smart Injection technology
- Excellent abrasion resistance

T-01

- Anatomic insole for more comfort
- Supporting PU foam = Dissipation and Energy Return
- Fully lined with conductive micro-perforated fabric to reduce foam wearing
